Becoming Wild Carl Safina,2020-04-14 A NEW YORK TIMES NOTABLE BOOK OF 2020 In this superbly articulate cri de coeur, Safina gives us a new way of looking at the natural world that is radically different.—The Washington Post New York Times bestselling author Carl Safina brings readers close to three non-human cultures—what they do, why they do it, and how life is for them. A New York Times Notable Books of 2020 Some believe that culture is strictly a human phenomenon. But this book reveals cultures of other-than-human beings in some of Earth’s remaining wild places. It shows how if you’re a sperm whale, a scarlet macaw, or a chimpanzee, you too come to understand yourself as an individual within a particular community that does things in specific ways, that has traditions. Alongside genes, culture is a second form of inheritance, passed through generations as pools of learned knowledge. As situations change, social learning—culture—allows behaviors to adjust much faster than genes can adapt. *Becoming Wild* brings readers into intimate proximity with various nonhuman individuals in their free-living communities. It presents a revelatory account of how animals function beyond our usual view. Safina shows that for non-humans and humans alike, culture comprises the answers to the question, “How do we live here?” It unites individuals within a group identity. But cultural groups often seek to avoid, or even be hostile toward, other factions. By showing that this is true across species, Safina illuminates why human cultural tensions remain maddeningly intractable despite the arbitrariness of many of our differences. *Becoming Wild* takes readers behind the curtain of life on Earth, to witness from a new vantage point the most world-saving of perceptions: how we are all connected.

The Kumulipo Queen Liliuokalani,2020-03-05 This is Queen Liliuokalani's translation of the Hawaiian Creation chant, the Kumulipo. She translated this while under house arrest at Iolani Palace, and it was subsequently published in 1897. This is an

extremely rare book which was republished (in a very scarce edition) by Pueo Press in 1978. The Kumulipo's composition is attributed to one of Liliuokalani's eighteenth century ancestors, Keaulumoku, just prior to European contact. It is a sophisticated epic which describes the origin of species in terms that Darwin would appreciate. The Kumulipo moves from the emergence of sea creatures, to insects, land plants, animals, and eventually human beings. It describes a complicated web of interrelationships between various plants and animals. The most massive part of the chant is a genealogy which enumerates thousands of ancestors of the Hawaiian royal family. The Kumulipo is also available at this site in the 1951 translation of Martha Warren Beckwith, with comprehensive analysis and the complete Hawaiian text. However Liliuokalani's version is of some historical significance. The last Queen of Hawaii, Liliuokalani was extremely literate, and steeped in Hawaiian tradition. She was the author of the well-known Hawaiian anthem, Aloha 'Oe as well as a Hawaiian history book, Hawaii's Story by Hawaii's Queen.

If I Were a Whale Shelley Gill,2017-02-21 From best-selling children's author Shelley Gill comes this colorful, rhyming board book playfully featuring whales found in the Pacific, Atlantic, and Arctic Oceans. Toddlers will love learning about whales swimming in the deep blue sea in this beautifully illustrated board book that shares simple whale facts in an imaginative way. If I could be anything, do you know what I'd be? I'd be a whale in the deep blue sea. Scooping up fishes and flipping my tail, I'd be a minke or beluga whale.

Advances in Marine Vertebrate Research in Latin America Marcos R. Rossi-Santos, Charles W. Finkl, 2017-08-10 This book gathers the most recent research findings on ecology and conservation of marine vertebrates in Latin America, making use of high technological methods to show readers the diversity of the marine research that has been conducted in these countries over the last decades. The book brings authors from more than 23 institutions of 7 different countries developing the most diverse research aiming at ocean conservation through the ecology of different vertebrate animals, such as whales, dolphins, manatees, turtles, seabirds and fish. This book deals with technological advances and innovation in the ecology and conservation of marine vertebrates in Latin America. This eclectic collection is broad in scope but provides

detailed summaries of new methods that are deployed in the study of marine environmental conservation. Key issues revolve around the development and application of educational methodologies in the field of marine vertebrate research, which provide a rational basis for better management of marine environments using modern techniques associated with GIS, satellite tracking, aerial systems, bioacoustics, biogeochemistry, genetics, underwater videography, species photoidentification, molecular biology, trophic ecological methods, ethological methods, and behavioural ecology, among others. Discussion and elucidation of these kinds of techniques are aimed at university-level students and post-graduate researchers. The scope of this volume includes whales, sharks, rays, dolphins, tropical fishes, turtles, manatees as well as aspects of Latin American marine ecosystem conservation. Researchers in this biogeographic region, as well as others involved with marine vertebrate research, will find this work essential reading.

Marine Mammals: Fisheries, Tourism and Management Issues Nicholas Gales, Mark Hindell, Roger Kirkwood, 2003-10-22
Marine Mammals: Fisheries, Tourism and Management Issues brings together contributions from 68 leading scientists from 12 countries to provide a comprehensive, up-to-date review on the way we manage our interactions with whales, dolphins, seals and dugongs. The book examines how we have fared conserving the world's marine mammal populations, with a focus on the key issues of fisheries and tourism. From a unique southern hemisphere perspective, the authors consider how science informs the culling debate, how wild fisheries and aquaculture interact with marine mammal populations and how we might manage the effects of whale, dolphin and seal watching industries. The authors also address other issues such as the way in which ethics, genetics, acoustics, ecosystem models and pollution influence the management and conservation of marine mammals. *Marine Mammals* is an invaluable and accessible resource for all those involved with marine mammals, including scientists, managers, policy makers, industry representatives and students. Winner of a 2004 Whitley Award.

The Cultural Lives of Whales and Dolphins Hal Whitehead, Luke Rendell, 2015 Drawing on their own research as well as scientific literature including evolutionary biology, animal behavior, ecology, anthropology, psychology and neuroscience, two cetacean biologists submerge themselves in the unique environment in which whales and dolphins live. --Publisher's description.

Thousand-Mile Song David Rothenberg, 2010-05 In *Thousand Mile Song*, musician and philosopher David Rothenberg uses the enigma of whale sounds to explore whether we can truly understand nonhuman minds. Interviewing scholars around the world as they attempt to decipher underwater music, Rothenberg tells the story of scientists and artists confronting an unknown as vast as the ocean. Along the way, he plays his clarinet live with whales in their native habitats, from Russia to

Hawaii, making interspecies music that appears on the included CD. Richly detailed and deeply entertaining, Thousand Mile Song is an imaginative look at the most intriguing creatures of the ocean.
