**Ask Dr. Mueller**-Cookie Mueller 1997 Ask Dr. Mueller captures the glamour and grittiness of Cookie Mueller's life and times. Here are previously unpublished stories - wacky as they are enlightening - along with favorites from Walking Through Clear Water in a Pool Painted Black and other publications. Also the best of Cookie's art columns from Details magazine, and the funniest of her advice columns from the East Village Eye, on everything from homeopathic medicine to how to cut your cocaine with a healthy substance. This collection is as much an autobiography as it is a map of downtown New York in the early '80s - that moment before Bright Lights, Big City, before the art world exploded, before New York changed into a yuppie metropolis, while it still had a glimmer of bohemian life.

**Applications of Gene-Based Technologies for Improving Animal Production and Health in Developing Countries**-Harinder P.S. Makkar 2005-08-12 Modern Biotechnology has potential for solving many problems associated with animal productivity and health and offers exciting opportunities for enhancing agricultural productivity. At present the focus is, however, on the issues and problems of significance for livestock producers in the developed world. In order to fully realize the benefits of this technology in developing countries, there is a need to identify, characterize and apply appropriate gene-based technologies for these regions. These proceedings present peer reviewed state-of-the-art papers describing the achievements in the areas of animal breeding and genetics, animal nutrition, animal health, and environment, ethics, safety, and regulatory aspects of gene-based technologies; achievements which could be realized using these modern scientific tools to maximise the benefits from the 'livestock revolution' that is taking place; and the constraints in the use of gene-based technologies and their specific research needs. This book will help in bridging the wide gap between developed and developing countries, in the development and use of gene-based technologies, and to elucidate the current and future roles of such technologies in the developing world. It is a good reference source for researchers, students and policy-makers alike.

**Common Goods**-Catherine Keller 2015-12-01 In the face of globalized ecological and economic crises, how do religion, the postsecular, and political theology reconfigure political theory and practice? As the planet warms and the chasm widens between the 1 percent and the global 99, what thinking may yet energize new alliances between religious and irreligious constituencies? This book brings together political theorists, philosophers, theologians, and scholars of religion to open discursive and material spaces in which to shape a vibrant planetary commons. Attentive to the universalizing tendencies of “the common,” the contributors seek to reappropriate the term in response to the corporate logic that asserts itself as a universal solvent. In the resulting conversation, the common returns as an interlinked manifold, under the ethos of its multitudes and the ecology of its multiplicity. Beginning from what William Connolly calls the palpable “fragility of things,” Common Goods assembles a transdisciplinary political theology of the Earth. With a nuance missing from both atheist and orthodox religious approaches, the contributors engage in a multivocal conversation about sovereignty, capital, ecology, and civil society. The result is an unprecedented thematic assemblage of cosmopolitics and religious diversity; of utopian space and the time of insurrection; of Christian socialism, radical democracy, and disability theory; of quantum entanglement and planetarity; of theology fleshly and political.

**Gas Dynamics**-E. Rathakrishnan 2004-08

**Fernando Pessoa & Co.**-Fernando Pessoa 2007-12-01 Fernando Pessoa (1888-1935) - a poet who lived most his life in Lisbon, Portugal, and who died in obscurity there - has in recent years gained international recognition as one of the greatest writers of the twentieth century. Now Richard Zenith has collected in a single volume all the major poetry of one of the most extraordinary poetic talents the century has produced (Microsoft Network's Reading Forum). Fernando Pessoa was as much a creator of personas as he was of poetry, prose, and criticism. He wrote under numerous heteronyms, literary alter egos with fully fleshed identities and writing styles, who supported and criticized each other's work in the margins of his drafts and in the literary journals of the time. From spare minimalism to a revolutionary exuberance that recalls Leaves of Grass, Pessoa's oeuvre was radically new and anticipated contemporary literary concerns to an unnerving degree. The first comprehensive edition of Pessoa's poetry in the English language, Fernando Pessoa & Co. is a work of extraordinary depth and poetic precision. Zenith's selection of Pessoa is a beautiful one-volume course in the soul of the twentieth century. — Booklist
