Creating Art for All Ages-Frances Flicker 2019-12-01 This is book two of a series of three books. The series takes students on an interdisciplinary cross content journey entitled, Creating Art Through the Ages. Each book provides experiences in language arts, social studies, math and art as the students investigate ancient and modern civilizations. "Discovery and Knowledge", explores the ancient Roman civilization, the Middles Ages and Renaissance. Explorers set sail to discover land, treasures, raw materials and knowledge on behalf of their mother country and religion. The development of the printing press enabled the disbursement of knowledge through books. Discovery and the pursuit of knowledge is the underlying theme during this era. In this book, it is reimagined for students with experiences through stories, interactive role-playing activities, and art projects.

Computer Analysis of Images and Patterns-Xiaoyi Jiang 2009-08-29 It was an honor and a pleasure to organizethe 13th International Conference on Computer Analysis of Images and Patterns (CAIP 2009) in Mu'nster, Germany. CAIP has been held biennially since 1985: Berlin (1985), Wismar (1987), Leipzig (1989), Dresden (1991), Budapest (1993), Prague (1995), Kiel (1997), Ljubljana (1999), Warsaw (2001), Groningen (2003), Paris (2005), and Vienna (2007). Initially, this conference series served as a forum for getting together s-entistsfromEastandWestEurope.Nowadays,CAIPenjoysahighinternational visibility and attracts participants from all over the world. For CAIP 2009 we received a record number of 405 submissions. All papers were reviewed by two, and in most cases, three reviewers. Finally, 148 papers were selected for presentation at the conference, resulting in an acceptance rate of 36%. All Program Committee members and additional reviewers listed here deserve a great thanks for their timely and competent reviews. The accepted papers were presented either as oral presentations or posters in a single-track program.In addition, wewereveryhappyto haveAljoscha Smolicand David G. Storkasourinvitedspeakerstopresenttheirworkintwofascinatingareas.With this scienti?c program we hope to continue the tradition of CAIP in providing a forum for scienti?c exchange at a high quality level. A successful conference like CAIP 2009 would not be possible without the support of many institutions and people. First of all, we like to thank all the authors of submitted papers and the invited speakers for their contributions. The Steering Committee members were always there when advice was needed.

The Glass Castle-Jeannette Walls 2006-01-02 Journalist Walls grew up with parents whose ideals and stubborn nonconformity were their curse and their salvation. Rex and Rose Mary and their four children lived like nomads, moving among Southwest desert towns, camping in the mountains. Rex was a charismatic, brilliant man who, when sober, captured his children's imagination, teaching them how to embrace life fearlessly. Rose Mary painted and wrote and couldn't stand the responsibility of providing for her family. When the money ran out, the Walls retreated to the dismal West Virginia mining town Rex had tried to escape. As the dysfunction escalated, the children had to fend for themselves, supporting one another as they found the resources and will to leave home. Yet Walls describes her parents with deep affection in this tale of unconditional love in a family that, despite its profound flaws, gave her the fiery determination to carve out a successful life. -- From publisher description.

Mixing It Up: Integrated, Interdisciplinary, Intriguing Science in the Elementary Classroom- 2003 This book—a compilation of 25 practical articles from NSTA's elementary school journal, Science & Children—offers a wealth of lesson plans and idea starters using interdisciplinary, integrated, and thematic approaches. Discover how a language arts unit on survival can include student inquiry into properties of ice, ways to improve students' observational skills as they write haiku about nature, how to use data collection and math in mapping the ocean floor, and more. To engage students schoolwide or in the great outdoors, several articles offer project-based interdisciplinary units that are widely adaptable. Each article is categorized by grade level, the National Science Education Standards it addresses, and whether it is interdisciplinary, integrated, thematic, or a combination of the three. Even teachers who lack a strong science background will find these concrete techniques especially valuable for teaching science through other subjects (and vice versa).
