Mineral Building Traditions in the Himalayas-Hubert Feiglstorfer 2019-11-05 Mineral building materials and regionally related methods of processing are an essential part of building culture throughout the Himalayas. Based on transregional knowledge transfer, raw materials have been able to find an ecologically and economically optimised destiny in particular local applications. For this study, samples were collected as raw material or originated from certain building components. Samples were analysed according to their material properties and architectural application. Traditional building techniques were examined and their correlation with traceable material qualities studied. Clay-specific properties such as colour, grain size distribution, grain shape, hardness, plasticity, organic additives, or bulk and clay mineral properties were used as comparative parameters. This study gives fresh insight into the interaction between technical requirements, environmental resources and material implementation. It is the first scientific approach in studying the Himalayan earthen heritage in a wide scope and connecting material research and cultural heritage from various perspectives - in particular archaeology, architecture, research on materials and building techniques.

Introduction to Unmanned Aircraft Systems, Second Edition-Douglas M. Marshall 2015-10-26 The proliferation of technological capability, miniaturization, and demand for aerial intelligence is pushing unmanned aerial systems (UAS) into the realm of a multi-billion dollar industry. This book surveys the UAS landscape from history to future applications. It discusses commercial applications, integration into the national airspace system (NAS), System function, operational procedures, safety concerns, and a host of other relevant topics. The book is dynamic and well-illustrated with separate sections for terminology and web- based resources for further information.

Comprehensive Medicinal Chemistry III- 2017-06-03 Comprehensive Medicinal Chemistry III provides a contemporary and forward-looking critical analysis and summary of recent developments, emerging trends, and recently identified new areas where medicinal chemistry is having an impact. The discipline of medicinal chemistry continues to evolve as it adapts to new opportunities and strives to solve new challenges. These include drug targeting, biomolecular therapeutics, development of chemical biology tools, data collection and analysis, in silico models as predictors for biological properties, identification and validation of new targets, approaches to quantify target engagement, new methods for synthesis of drug candidates such as green chemistry, development of novel scaffolds for drug discovery, and the role of regulatory agencies in drug discovery. Reviews the strategies, technologies, principles, and applications of modern medicinal chemistry Provides a global and current perspective of today's drug discovery process and discusses the major therapeutic classes and targets Includes a unique collection of case studies and personal assays reviewing the discovery and development of key drugs

Recent Advances in Structural Engineering, Volume 1-A. Rama Mohan Rao 2018-08-01 This book is a collection of select papers presented at the Tenth Structural Engineering Convention 2016 (SEC-2016). It comprises plenary, invited, and contributory papers covering numerous applications from a wide spectrum of areas related to structural engineering. It presents contributions by academics, researchers, and practicing structural engineers addressing analysis and design of concrete and steel structures, computational structural mechanics, new building materials for sustainable construction, mitigation of structures against natural hazards, structural health monitoring, wind and earthquake engineering, vibration control and smart structures, condition assessment and performance evaluation, repair, rehabilitation and retrofit of structures. Also covering advances in construction techniques/ practices, behavior of structures under blast/impact loading, fatigue and fracture, composite materials and structures, and structures for non-conventional energy (wind and solar), it will serve as a valuable resource for researchers, students and practicing engineers alike.

Rediscovering Kurdistan's Cultures and Identities-Joanna Bocheńska 2018-10-26 Rediscovering Kurdistan's Cultures and Identities: The Call of the Cricket offers insight into little-known aspects of the social and cultural activity and changes taking place in different parts of Kurdistan (Turkey, Iraq, Syria and Iran), linking different theoretical approaches within a postcolonial perspective. The first chapter presents the book's approach to postcolonial theory and gives a brief introduction to the historical context of Kurdistan. The second, third and fourth chapters focus on the Kurdish context, examining ethical changes as revealed in Kurdish literary and cinema narratives, the socio-political role of the Kurdish cultural institutions and the practices of countering othering of Kurdish migrants living in Istanbul. The fifth chapter offers an analysis of the nineteenth-century missionary translations of the Bible into the Kurdish language. The sixth chapter examines the formation of Chaldo-Assyrian identity in the context of relations with the Kurds after the overthrow of the Ba'ath regime in 2003. The last chapter investigates the question of the Yezidis' identity, based on Yezidi oral works and statements about their self-identification.

What the Emperor Built-Aurelia Campbell 2020-05-15 One of the most famous rulers in Chinese history, the Yongle emperor (r. 1402–24) gained renown for constructing Beijing's magnificent Forbidden City, directing ambitious naval expeditions, and creating the world's largest encyclopedia. What the Emperor Built is the first book-length study devoted to the architectural projects of a single Chinese emperor. Focusing on the imperial palaces in Beijing, a Daoist architectural complex on Mount Wudang, and a Buddhist temple on the Sino-Tibetan frontier, Aurelia

Campbell demonstrates how the siting, design, and use of Yongle’s palaces and temples helped cement his authority and legitimize his usurpation of power. Campbell offers insight into Yongle’s sense of empire—from the far-flung locations in which he built, to the distant regions from which he extracted construction materials, and to the use of tens of thousands of craftsmen and other laborers. Through his constructions, Yongle connected himself to the divine, interacted with his subjects, and extended imperial influence across space and time. Spanning issues of architectural design and construction technologies, this deft analysis reveals remarkable advancements in timber-frame construction and implements an art-historical approach to examine patronage, audience, and reception, situating the buildings within their larger historical and religious contexts.

NEHRP Recommended Provisions (National Earthquake Hazards Reduction Program) for Seismic Regulations for New Buildings and Other Structures: Provisions-United States. Federal Emergency Management Agency 2001

Love Letters from Golok-Holly Gayley 2016-12-06 Love Letters from Golok chronicles the courtship between two Buddhist tantric masters, Tāre Lhamo (1938–2002) and Namtrul Rinpoche (1944–2011), and their passion for reinvigorating Buddhism in eastern Tibet during the post-Mao era. In fifty-six letters exchanged from 1978 to 1980, Tāre Lhamo and Namtrul Rinpoche envisioned a shared destiny to "heal the damage" done to Buddhism during the years leading up to and including the Cultural Revolution. Holly Gayley retrieves the personal and prophetic dimensions of their courtship and its consummation in a twenty-year religious career that informs issues of gender and agency in Buddhism, cultural preservation among Tibetan communities, and alternative histories for minorities in China. The correspondence between Tare Lhamo and Namtrul Rinpoche is the first collection of "love letters" to come to light in Tibetan literature. Blending tantric imagery with poetic and folk song styles, their letters have a fresh vernacular tone comparable to the love songs of the Sixth Dalai Lama, but with an eastern Tibetan flavor. Gayley reads these letters against hagiographic writings about the couple, supplemented by field research, to illuminate representational strategies that serve to narrate cultural trauma in a redemptive key, quite unlike Chinese scar literature or the testimonials of exile Tibetans. With special attention to Tare Lhamo's role as a tantric heroine and her hagiographic fusion with Namtrul Rinpoche, Gayley vividly shows how Buddhist masters have adapted Tibetan literary genres to share private intimacies and address contemporary social concerns.

Engineering Microbes for Therapy-Aleš Berlec 2019-05-30 Microbes can play protective role in human health, and the concepts of probiotics and microbiota have been well established in recent years. Probiotics have an important economic impact in food, food supplement and veterinary industry with increasing market size. Engineering microbes for therapy can lead to selection of new microbial strains and mixtures, or targeted improvement of existing microbial strains, achieved by mutagenesis, genetic engineering and synthetic biology. Engineering of microbes can also encompass the development and improvement of their dosage forms. Possible uses of engineered microbes include antigen delivery, immunomodulation, inflammation, cancer, infectious diseases and metabolic disorders. The eBook represents an up-to-date overview, shows new results, as well as demonstrates future trends in the developing field of therapeutic microbial engineering.

Resurrecting Candrakirti-Kevin A. Vose 2015-09-29 The seventh-century Indian master Candrakirti lived a life of relative obscurity, only to have his thoughts and writings rejuvenated during the Tibetan transmission of Buddhism. Since then, Candrakirti has been celebrated as offering the most thorough and accurate vision of Nagarjuna's view of emptiness which, in turn, most fully represents the final truth of the Buddha's teaching. Candrakirti's emptiness denies the existence of any "nature" or substantial, enduring essence in ourselves or in the phenomenal world while avoiding the extreme view of nihilism. In this view, our false belief in nature is at the root of our ignorance and is the basis for all mental and emotional pain and disturbance. For many Tibetan scholars, only Candrakirti's Middle Way entirely overcomes our false belief in inherent identity and, consequently, alone overcomes ignorance, delivering freedom from the cycle of uncontrolled death and rebirth known as samsara. Candrakirti's writings have formed the basis for Madhyamaka study in all major traditions of Tibetan Buddhism. In Resurrecting Candrakirti, Kevin Vose presents the reader with a thorough presentation of Candrakirti's rise to prominence and the further elaborations the Tibetans have made on his presentation of emptiness. By splitting Madhyamaka into two subschools, namely the Svatantrika and Prasangika, the Tibetans became pioneers in understanding reality and created a new way to define differences in interpretation. Resurrecting Candrakirti provides the historical and philosophical context necessary to understand both Madhyamaka and its importance to Tibetan Buddhist thought.

Handbook of Research on Citizenship and Heritage Education-Delgado-Algarra, Emilio José 2020-01-31 Cultural competence in education promotes civic engagement among students. Providing students with educational opportunities to understand various cultural and political perspectives allows for higher cultural competence and a greater understanding of civic engagement for those students. The Handbook of Research on Citizenship and Heritage Education is a critical scholarly book that provides relevant and current research on citizenship and heritage education aimed at promoting active participation and the transformation of society. Readers will come to understand the role of heritage as a symbolic identity source that facilitates the understanding of the present and the past, highlighting the value of teaching. Additionally, it offers a source for the design of didactic proposals that promote active participation and the critical conservation of heritage. Featuring a range of topics such as educational policy, curriculum design, and political science, this book is ideal for educators, academicians, administrators, political scientists, policymakers, researchers, and students.

Managing Work-Life Balance in Construction-Helen Lingard 2009-04-09 Work in the construction industry is particularly tough. It demands excessively long hours and frequent weekend work. Other characteristics are particularly marked, such as re-location, job insecurity and distinctive behavioural patterns, which negatively affect employees’ personal lives further. Work-life balance has emerged as one of the most pressing management issues in the 21st century. For construction managers dealing with traditional models of work and rigid work schedules, the issue may be especially difficult to manage, and yet the work-life balance is now recognised as an issue of strategic importance to the construction industry. It is critical to the construction industry’s continued ability to attract and retain a talented workforce, and it is also inextricably linked to organizational effectiveness and employees’ well-being. This book presents the argument for the management of work-life balance in the construction industry. It maps the changes to the workforce demographic profile and the changing expectations relating to work and personal life that occurred during the second half of the 20th century. Legal imperatives for managing work-life balance are set out. It also presents work-life balance theory and discusses the practical implications of research, along with extensive empirical data collected from the industry. Lastly, practical advice is provided about what construction organizations can and should do to manage work-life balance. This provides a unique guide to a key issue.

Business As Unusual-Jack Uldrich 2020-10-13 Today is the slowest rate of change we will ever experience. From this provoking premise, global futurist Jack Uldrich succinctly delivers ten Big AHA (awareness, humility, and action) ideas focused on helping business leaders and organizations navigate tomorrow’s uncharted and unpredictable waters. Uldrich’s unrivaled, fast-paced manifesto not only explains why “business as unusual” will be the new normal, but also unpacks a series of uncommon and unorthodox actions designed to help you create and unleash a future of unparalleled success. To navigate the future, business leaders must • be AWARE of how technological , economic, social, cultural, and political trends are accelerating, burgeoning, and converging; • have HUMILITY to the idea that what worked yesterday might not be sufficient tomorrow; • take ACTION to create a new and better future. Business as Unusual reveals that the future is the one thing that everyone can change. To find success in business, you must believe the unbelievable, think about the unthinkable, listen to the unconventional, and question the unquestionable.

Chapters from life of Tibetians-Jandáček, Petr 2019-11-01 E-kniha Chapters from Lives of Tibetans byla napsána magisterskými a doktorskými studenty tibetanistiky jako přehled, respektive učební pomůcka pro bakalářské studenty, kteří se poprvé setkávají s výukou tibetských kulturních reálií. Jejím cílem je stručně rekapitulovat život Tibeťana od narození až do smrti a při tom se zaměřit na některé důležité aspekty tibetské kultury. V jedenácti kapitolách popisuje porod a péči o děti, přechodové rituály včetně svatby, rodinný život, zaměstnání, zábavu, příklady výročních a náboženských rituálů, smrt a pohřební rituály. Kromě toho chce publikace seznámit čtenáře s tibetskými termíny užívanými v daném kontextu a v literatuře, a dát tím náměty pro další četbu a konverzaci v tibetštině.

A Handbook of Process Tracing Methods-Michael Schulte-Mecklenbeck 2019-06-10 A Handbook of Process Tracing Methods demonstrates how to better understand decision outcomes by studying decision processes, through the introduction of a number of exciting techniques. Decades of research have identified numerous idiosyncrasies in human decision behavior, but some of the most recent advances in the scientific study of decision making involve the development of sophisticated methods for understanding decision process—known as process tracing. In this volume, leading experts discuss the application of these methods and focus on the best practices for using some of the more popular techniques, discussing how to incorporate them into formal decision models. This edition has been expanded and thoroughly updated throughout, and now includes new chapters on mouse tracking, protocol analysis, neurocognitive methods, the measurement of valuation, as well as an overview of important software packages. The volume not only surveys cutting-edge research to illustrate the great variety in process tracing techniques, but also serves as a tutorial for how the novice researcher might implement these methods. A Handbook of Process Tracing Methods will be an essential read for all students and researchers of decision making.

Communication, Networks and Computing-Shekhar Verma 2018-10-10 This book (CCIS 839) constitutes the refereed proceedings of the First International Conference on Communication, Networks and Computings, CNC 2018, held in Gwalior, India, in March 2018. The 70 full papers were carefully reviewed and selected from 182 submissions. The papers are organized in topical sections on wired and wireless communication systems, high dimensional data representation and processing, networks and information security, computing techniques for efficient networks design, electronic circuits for communication system.

The 60's Communes-Timothy Miller 2015-02-01 The greatest wave of communal living in American history crested in the tumultuous 1960s era including the early 1970s. To the fascination and amusement of more decorous citizens, hundreds of thousands of mostly young dreamers set out to build a new culture apart from the established society. Widely believed by the larger public to be sinks of drug-ridden sexual immorality, the communes both intrigued and repelled the American people. The intentional communities of the 1960s era were far more diverse than the stereotype of the hippie commune would suggest. A great many of them were religious in basis, stressing spiritual seeking and disciplined lifestyles. Others were founded on secular visions of a better society. Hundreds of them became so stable that they survive today. This book surveys the broad sweep of this great social yearning from the first portents of a new type of communitarianism in the early 1960s through the waning of the movement in the mid-1970s. Based on more than five hundred interviews conducted for the 60s Communes Project, among other sources, it preserves a colorful and vigorous episode in American history. The book includes an extensive directory of active and non-active communes, complete with dates of origin and dissolution.

Steel in the Field-Greg Bowman 1997

Kailas Histories-Alex McKay 2015-10-30 Kailas Histories demonstrates how British colonial, Hindu modernist, and New Age interests synthesised historically diverse representations to construct the understanding of Tibet's great pilgrimage centre Mount Kailas - and India's Gangotri - as ancient sacred sites embodying a universal sacrality.

The Holy Madmen of Tibet-David M. DiValerio 2015-07-15 Throughout the past millennium, certain Tibetan Buddhist yogins have taken on profoundly norm-overturning modes of dress and behavior, including draping themselves in human remains, consuming filth, provoking others to violence, and even performing sacrilege. They became known far and wide as "madmen" (smyon pa, pronounced nyönpa), achieving a degree of saintliness in the process. This book offers the first comprehensive study of Tibet's "holy madmen" drawing on their biographies and writings, as well as tantric commentaries, later histories, oral traditions, and more. Much of The Holy Madmen of Tibet is dedicated to examining the lives and legacies of the three most famous "holy madmen" who were all of the Kagyü sect: the Madman of Tsang (author of The Life of Milarepa), the Madman of Ü, and Drukpa Künlé, Madman of the Drukpa Kagyü. Each born in the 1450s, they rose to prominence during a period of civil war and of great shifts in Tibet's religious culture. By focusing on literature written by and about the "holy madmen" and on the yogins' relationships with their public, this book offers in-depth looks at the narrative and social processes out of which sainthood arises, and at the role biographical literature can play in the formation of sectarian identities. By showing how understandings of the "madmen" have changed over time, this study allows for new insights into current notions of "crazy wisdom." In the end, the "holy madmen" are seen as self-aware and purposeful individuals who were anything but insane.
