Effective Medium-term Planning for Teachers-Lee Jerome 2015-01-21 Effective medium-term planning is the 'holy grail' of planning. Once teachers are able to conceptualise learning over a longer period of time, they are empowered to achieve outstanding learning as part of their everyday teaching. This book explains why medium term plans are important and how to go about constructing them. Key coverage includes: Practical guidance to support teachers to build their own effective medium-term plans Examples of planning in action, exploring key principles that can be applied to your own practice Theoretical and practical justifications for the importance of medium-term planning Exploration of the links between raising attainment and effective medium-term planning This is essential reading for initial teacher education students on university-based and school-based courses preparing to teach in primary and secondary education, and early career teachers seeking to continue their professional learning.

My Revision Notes: AQA GCSE Religious Studies: Religion and Life Issues and Religion and Morality-Lesley Parry 2014-03-28 Unlock your full potential with these revision guides which focus on the key content and skills you need to know. With My Revision Notes for AQA GCSE Religious Studies Religion and Life Issues and Religion and Morality you can: - Take control of your revision: plan and focus on the areas you need to revise with content summaries and commentary from expert authors - Show you fully understand key topics by using specific examples to add depth to your understanding of the key issues - Apply Religious Studies' terms accurately with the help of definitions and key words on all topics - Improve your skills to tackle specific exam questions with self-testing and exam-style questions and answers.

Using Film and Media in the Language Classroom-Dr. Carmen Herrero 2019-07-02 This book demonstrates the positive impact of using film and audiovisual material in the language classroom. The chapters are evidence-based and address different levels and contexts of learning around the world. They demonstrate the benefits of using moving images and films to develop intercultural awareness and promote multilingualism, and suggest Audiovisual Translation (AVT) activities and projects to enhance language learning. The book will be a valuable continuing professional development resource for language teachers and those involved in curriculum development, as well as bringing the latest research, theory and pedagogical techniques to teacher training courses.

GCSE Maths Edexcel Higher Student Book (Collins GCSE Maths)-Kevin Evans 2021-09-20 Exam Board: Edexcel Level & Subject: GCSE Maths First teaching: September 2015 First exams: June 2017 Endorsed by Edexcel

Jamaica Inn-Daphne du Maurier 2004-05-05 Shrubs of broom grow black and twistedAs if by Devil's fingers And the wind that never ceases, Like a chorus from the dead. Those who lived here it's for certain, would grow dark and tortured too' In Jamaica Inn, at the heart of the bleak Bodmin Moor, young Mary Yellen soon discovers mysterious goings-on in the dead of night. But worse is yet to come as Mary finds herself helplessly ensnared in the deadly activities taking place around her. Evocative, atmospheric and chilling, this new adaptation of Jamaica Inn has all the hallmarks of a great adventure classic — murder, mystery and malevolence. Jamaica Inn was produced at the Salisbury Playhouse in May 2004and was followed by a UK tour.

Further Maths Practice Book-Trevor Senior 2013-01-01 Aimed at Level 2 maths work and suitable to support the AQA Level 2 Certificate in Further Mathematics. GCSE Maths Edexcel Foundation Student Book (Collins GCSE Maths)-Kevin Evans 2021-09-20 Exam Board: Edexcel Level & Subject: GCSE Maths First teaching: September 2015 First exams: June 2017 Endorsed by Edexcel

Edexcel GCSE (9-1) Business, Second Edition-Ian Marcouse 2017-05-08 Exam Board: Edexcel Level: GCSE Subject: Business First Teaching: September 2017 First Exam: June 2019 Endorsed for Edexcel Let Ian Marcouse successfully steer you through the new specification with his proven and popular approach to Business; clear content coverage is enhanced by numerous real-life examples to create a course that engages, motivates and develops every student. - Breaks down the content of the 2017 specification into clear, accessible explanations of important concepts and theories - Helps students apply their knowledge to a range of real business examples, issues and contexts, supported by 'Talking Points' that encourage critical and commercial thinking - Improves quantitative, investigative, analytical and evaluation skills through end-of-chapter exercises - Builds students' confidence approaching their exams as they practise calculation, short answer and extended-writing questions with stimulus materials - Boosts students' vocabulary and supports revision with definitions of key terminology for each topic

Exam Literacy-Jake Hunton 2018-08-13 In Exam Literacy: A guide to doing what works (and not what doesn't) to better prepare students for exams, Jake Hunton focuses on the latest cognitive research into revision techniques and delivers proven strategies which actually work. Foreword by Professor John Dunlosky. 'Read, highlight, reread, repeat if such a revision cycle sounds all too wearily familiar, you and your students need a better route to exam success. And in light of the recent decision to make all subjects at GCSE linear, so that students will be tested in one-off sittings, it will be even more important that students are well equipped to acquire and recall key content ahead of their exams. In this wide-ranging guide to effective exam preparation, Jake Hunton casts a careful eye over a wide range of research into revision techniques and details the strategies which have been proven to deliver the best results. With plenty of practical suggestions and subject-specific examples, Exam Literacy provides teachers with user-friendly advice on how they can make the content they cover stick, and shares up-to-date, evidence-based information on: The nature of learning and the various types of memory. How to improve students' retention of knowledge and recall of content. Why popular revision techniques, such as rereading, highlighting and summarising, may not be as effective as you think. How revision strategies that have been identified as being more effective such as interleaving, elaborative interrogation, self-explanation and retrieval practice can be embedded into day-to-day teaching. How students can be encouraged to make use of these winning strategies when revising independently.

IB Physics Course Book-Michael Bowen-Jones 2014-01 The most comprehensive match to the new 2014 Chemistry syllabus, this completely revised edition gives you unrivalled support for the new concept-based approach, the Nature of science. The only DP Chemistry resource that includes support directly from the IB, focused exam practice, TOK links and real-life applications drive achievement.

Mathematics for CSEC is a clear and challenging text with extensive practice and worked examples to strengthen and consolidate student knowledge. Carefully structured skills development also facilitates smooth progression through the course.

New Grade 9-1 GCSE Maths Edexcel Student Book - Foundation (with Online Edition)-CGP Books 2019-05

Assessing 21st Century Skills-National Research Council 2011-09-16 The routine jobs of yesterday are being replaced by technology and/or shipped off-shore. In their place, job categories that require knowledge management, abstract reasoning, and personal services seem to be growing. The modern workplace requires workers to have broad cognitive and affective skills. Often referred to as "21st century skills," these skills include being able to solve complex problems, to think critically about tasks, to effectively communicate with people from a variety of different cultures and using a variety of different techniques, to work in collaboration with others, to adapt to rapidly changing environments and conditions for performing tasks, to effectively manage one's work, and to acquire new skills and information on one's own. The National Research Council (NRC) has convened two prior workshops on the topic of 21st century skills. The first, held in 2007, was designed to examine research on the skills required for the 21st century workplace and the extent to which they are meaningfully different from earlier eras and require corresponding changes in educational experiences. The second workshop, held in 2009, was designed to explore demand for these types of skills, consider intersections between science education reform goals and 21st century skills, examine models of high-quality science instruction that may develop the skills, and consider science teacher readiness for 21st century skills. The third workshop was intended to delve more deeply into the topic of assessment. The goal for this

workshop was to capitalize on the prior efforts and explore strategies for assessing the five skills identified earlier. The Committee on the Assessment of 21st Century Skills was asked to organize a workshop that reviewed the assessments and related research for each of the five skills identified at the previous workshops, with special attention to recent developments in technology-enabled assessment of critical thinking and problem-solving skills. In designing the workshop, the committee collapsed the five skills into three broad clusters as shown below: Cognitive skills: nonroutine problem solving, critical thinking, systems thinking Interpersonal skills: complex communication, social skills, team-work, cultural sensitivity, dealing with diversity Intrapersonal skills: self-management, time management, self-development, self-regulation, adaptability, executive functioning Assessing 21st Century Skills provides an integrated summary of the presentations and discussions from both parts of the third workshop.

Instant Revision-Paul Metcalf 2001-01-01

Alex's Adventures in Numberland-Alex Bellos 2011-04-04 A hugely enjoyable, brilliantly researched explanation of the basic principles of maths.

Learning to Teach History in the Secondary School-Terry Haydn 2014-10-10 'An excellent companion to Learning to Teach in Secondary School ... full of good ideas and better advice ... Mentors will certainly want to use it, and so, I'm sure, will the rest of the history department ... Make sure they buy one, and keep your copy under lock and key.' - Michael Duffy, Times Educational Supplement 'A very well written and readable book. Overall, this is an excellent book and one which students and teachers outwith England would find a valuable addition to their library.' - Scottish Association of Teachers of History, Resources Review 'This book is without question the standard text for the history PGCE market.' - Dr Ian Davies, University of York, on the first edition. Learning to Teach History in the Secondary School provides an accessible introduction to teaching and learning history at secondary level. Underpinned by a theoretical perspective and backed up by the latest research, it encourages student teachers to develop a personal approach to teaching history. This fourth edition has been thoroughly updated for the new curriculum, with a brand new chapter on subject knowledge and a new section on action research to better support those reflecting on and developing their own practice. It provides an array of references and materials that give a sound theoretical foundation for the teaching of history, including weblinks to further resources, while a range of tasks will enable students to put their learning into practice in the classroom. Practical advice is combined with reference and access to a wide range of recent and relevant research in the field of history education, to support Masters Level research and aid reflective practice. Key issues covered include: The benefits of learning history Planning The use of language and strategies for teaching Inclusion Technology in history teaching Assessment Continuing professional development Offering comprehensive and accessible support to becoming a history teacher, this book remains an invaluable resource for all training and newly qualified history teachers.

AQA GCSE Spanish for 2016: Higher Student Book-John Halksworth 2016-06-19 Our bestselling AQA GCSE Spanish course has been updated for the 2016 specification. This course offers brand new content, helping to develop the productive skills students need to manipulate language confidently and to prepare thoroughly for their exam. Its differentiated approach supports your mixed-ability classes, facilitating co-teaching.

Collins AQA Core Maths-Helen Ball 2016-06 Engage and motivate your Level 3 Mathematical Studies students, and deliver the new specification with confidence. Authentic real-life examples and ready to use data sets from a range of contexts develop mathematical skills and understanding. * Brings the subject to life by putting mathematics in context and showing its power and relevance in the real world * Closely matches the new AQA Mathematical Studies specification, with separate sections for compulsory units and optional pathways * Covers all ability levels within the A* to C range at GCSE * Encourages students to become effective problem solvers with a willingness to test out their ideas * Competence statements at the end of each chapter allow students to measure their own progress * The book includes a section on pre-release data to support students in their exam preparation

AQA GCSE (9-1) Engineering-Paul Anderson 2018-05-29 Exam board: AQA Level: GCSE Subject: Engineering First teaching: September 2017 First exams: Summer 2019 Build a foundation of knowledge alongside practical engineering skills for the 2017 AQA GCSE (9-1) Engineering specification, inspiring your students' problem solving skills for the NEA and beyond. This accessible textbook sets out clear learning objectives for each topic, with activities to reinforce understanding and examples that will support all students with the maths and science skills needed. - Builds knowledge of materials, manufacturing processes, systems, testing and investigation methods and modern technologies - Helps students to apply practical engineering skills to design and make imaginative prototypes that solve real and relevant engineering problems - Develops mathematical understanding with clear worked examples for all equations and maths skills and questions to test knowledge - Includes guidance on how to approach the non-exam assessment (NEA) with creativity and imagination - Prepares for the written exam with advice, tips and practice questions

AQA GCSE Psychology Second Edition-Mike Stanley 2017-02-09 Written by experienced senior examiners and authors, this new edition of the UK's bestselling AQA GCSE Psychology Student Book has been completely updated for the 2017 specification. With essential information for all key studies and a strong focus on exam skills, this book is packed with activities, practical ideas and revision summaries.

AQA GCSE Media Studies-Jerry Slater 2018-08-29

Physics-Jim Breithaupt 2015-01-22 This established text provides a first course in physics for students on access or foundation programmes and for non-specialist students on degree courses such as biological sciences, chemical sciences, engineering, mathematics and geology for whom physics is a subsidiary subject. The book is also suitable for trainee science teachers and medical students who need to develop a solid background in physics. Physics offers various routes into the subject via independent introductory sections on mechanics, materials, waves and electricity. Assuming no prior knowledge and focusing on the essentials, the text develops sections on fields, electromagnetism, electronics, atomic and nuclear physics, and advanced mechanics and thermodynamics, in a logical and succinct style. Illustrations are used extensively to support theoretical explanations and help readers understand the fundamentals of physics. Now in its fourth edition, Physics contains a new section on rotational dynamics, additional applications features throughout and it has an attractive new layout and design. Key features include: - mathematical exercises and extensive mathematical support - worked examples in every chapter - a glossary of key terms and concepts - chapter objectives and summaries - online resources at www.palgrave.com/foundations/breithaupt, including further case studies and experiments Ideal for use as a class text or for independent study, Physics will help students who are new to the subject to gain confidence in their knowledge and understanding of physics.

STP Mathematics for Jamaica Grade 9-Sue Chandler 2014-11 STP Mathematics for Jamaica is an, up-to-date, Mathematics course created by the STP Mathematics author team and Jamaican experts in Mathematics education and tailored to the needs of Lower Secondary students of Jamaica.

The Tudors - England, 1485-1603-Sally Waller 2015-09-03 Retaining well-loved features, this book covers in breadth issues of change, continuity, and cause and consequence in this period of English history through key questions such as how effectively did the Tudors develop the powers of the monarchy, and how did English society and economy change.
