Research in Education- 1971

Labor Relations Reference Manual- 1978 Vols. 9-17 include decisions of the War Labor Board.

The Standard-phonographic Dictionary-Andrew Jackson Graham 1862

Corruption in Higher Education-Elena Denisova-Schmidt 2020 "The lack of academic integrity combined with the prevalence of fraud and other forms of unethical behavior are problems that higher education faces in both developing and developed countries, at mass and elite universities, and at public and private institutions. While academic misconduct is not new, massification, internationalization, privatization, digitalization, and commercialization have placed ethical challenges higher on the agenda for many universities. Corruption in academia is particularly unfortunate, not only because the high social regard that universities have traditionally enjoyed, but also because students-young people in critical formative years-spend a significant amount of time in universities. How they experience corruption while enrolled might influence their later personal and professional behavior, the future of their country, and much more. Further, the corruption of the research enterprise is especially serious for the future of science. The contributors to Corruption in Higher Education: Global Challenges and Responses bring a range of perspectives to this critical topic"--

Change Management in TVET Colleges-Kraak, Andre 2016-07-25 The Technical and Vocational Education and Training (TVET) college environment is marked by increasingly stark juxtapositions between what needs to be achieved in the post-school education sector and the increasing difficulty of current conditions. The 'triple challenge' of poverty, inequality and unemployment weighs heavily on the social, political and economic fabric of the country and expectations are high that the TVET colleges can make a pivotal contribution to counter these challenges. Despite laudable increases in TVET enrolment, the education system needs to work harder to accommodate the weight of demand for post school further education and training (FET) band qualifications from young people not in education, employment or training. At the same time, it is vital to secure adequate quality in TVET programmes which depend so much on the competence and commitment of college lecturers. This collection offers a set of research papers that provide new analytic and empirical material on: • The political economy of TVET types in different countries which, by comparison, illuminate the South African case; • A periodisation of government interventions in the TVET sector over the last three decades; • The unsettled state and status of TVET lecturers in relation to their job requirements and conditions of service; • The halting evolution of collegial relationships between college lecturers towards higher collegiality; • Employer expectations of college graduates and how colleges are responding; and • An analysis of the outcomes of a college improvement intervention in Limpopo and the Eastern Cape. This book will offer valuable information and insights for decision-makers as well as analysts of institutional change concerning links between education and economic growth, with particular regard to TVET graduates' employment rates.

The Electrical World- 1887

Bow Bells- 1873

Provence A-Z-Peter Mayle 2009-09-23 The ultimate "dictionary" for lovers of Provence: Peter Mayle's personal selection of the foods, customs and words he finds most fascinating, curious, delicious, or just plain fun. Though organized from A to Z, this is hardly a conventional work of reference. In more than 170 entries, Peter Mayle—bestselling author of A Year in Provence—writes about subjects as wide-ranging as architecture and zingue-zingue-zoun (in the local patois, a word meant to describe the sound of a violin). And, of course, he writes about food and drink: vin rosé, truffles, olives, melons, bouillabaisse, the cheese that killed a Roman emperor, even a cure for indigestion. Provence A-Z is a delight for Peter Mayle's ever-growing audience and the perfect complement to any guidebook on Provence, or, for that matter, France.

ECKM2014-Proceedings of the 15th European conference on Knowledge Management-Carla Vivas 2014-10-01 The world economy in which we are living poses challenges that lead to a realization that 'more of the same' will be difficult to sustain. This provides an illustration that, in order to create new or modified knowledge practices, strengthen customer relationships and thus positively influence customer satisfaction, organizations must be flexible in configuring (combining) knowledge and knowledge structures in a way that is appropriate for delivering value to the customer. It must simultaneously develop effective strategies for updating the knowledge of its staff members necessary for underpinning the creation and delivery of appropriate knowledge services. Thus, unlearning (forgetting) becomes a critical means for organizational success. The ECKM community of scholars has already initiated dialogue that links its particular strengths to innovation issues. This conference aims to further that dialogue by attracting leading edge work that leverages the ECKM community's in-depth understanding of learning and unlearning to better understand knowledge management. Our aim is to stimulate breakthrough research streams linking learning, unlearning and knowledge management. How can organizations tailor, use, and extend techniques and tools from knowledge management for improving their business practices and processes? Building upon existing work on knowledge management (KM) and organizational learning, the conference will promote interdisciplinary approaches from computer science and information systems, business, management and organization science as well as cognitive science. Emphasis will be put on systematic learning from experience, KM tools and KM success factors. A special interest belongs to knowledge management initiatives which are lightweight (i.e., do not place considerable additional burden on users and KM experts), allow an incremental adoption (i.e., do not require large up-front investment before any return of investment is at least visible), and are flexible regarding frequent changes in experts and topics. Continuing the success of the ECKM conference series since 2000, the 2015 conference will provide an international communication forum bringing together academia and industry for discussing the progress made and addressing the challenges faced by continuous learning in knowledge-intensive organizations.

Domestic Technology Transfer-United States. Congress. House. Committee on Science and Technology. Subcommittee on Science, Research, and Technology 1978

Joint Acquisitions List of Africana- 1981

Trends in E-learning-Mahmut Sinecen 2018-08-01 This book presents a collection of different researches and results on "e-learning". The chapters cover the deficiencies, requirements, advantages and disadvantages of e-learning and distance learning. So, the authors reported their research and analysis results on "e-learning" according to their areas of expertise.

The Journal of Plumbing, Heating, Air Conditioning Contractors- 1917

The Parliamentary Debates (official Report(s)) ...-Great Britain. Parliament 1812

Higher Education in the Era of the Fourth Industrial Revolution-Nancy W. Gleason 2018-06-21 This open access collection examines how higher education responds to the demands of the automation economy and the fourth industrial revolution. Considering significant trends in how people are learning, coupled with the ways in which different higher education institutions and education stakeholders are implementing adaptations, it looks at new programs and technological advances that are changing how and why we teach and learn. The book addresses trends in liberal arts integration of STEM innovations, the changing role of libraries in the digital age, global trends in youth mobility, and the development of lifelong learning programs. This is coupled with case study assessments of the various ways China, Singapore, South Africa and Costa Rica are preparing their populations for significant shifts in labour market demands - shifts that are already underway. Offering examples of new frameworks in which collaboration between government, industry, and higher education institutions can prevent lagging behind in this fast changing environment, this book is a key read for anyone wanting to understand how the world should respond to the radical technological shifts underway on the frontline of higher education.

Global Perspectives on Recognising Non-formal and Informal Learning-Madhu Singh 2015-06-05 This book deals with the relevance of recognition and validation of non-formal and informal learning education and training, the workplace and society. In an increasing number of countries, it is at the top of the policy and research agenda ranking among the possible ways to redress the glaring lack of relevant academic and vocational qualifications and to promote the development of competences and certification procedures which recognise different types of learning, including formal, non-formal and informal learning. The aim of the book is therefore to present and share experience, expertise and lessons in such a way that enables its effective and immediate use across the full spectrum of country contexts, whether in the developing or developed world. It examines the importance of meeting institutional and political requirements that give genuine value to the recognition of non-formal and informal learning; it shows why recognition is important and clarifies its usefulness and the role it serves in education, working life and voluntary work; it emphasises the importance of the coordination, interests, motivations, trust and acceptance by all stakeholders. The volume is also premised on an understanding of a learning society, in which all social and cultural groups, irrespective of gender, race, social class, ethnicity, mental health difficulties are entitled to quality learning throughout their lives. Overall the thrust is to see the importance of recognising non-formal and informal learning as part of the larger movement for re-directing education and training for change. This change is one that builds on an equitable society and economy and on sustainable development principles and values such as respect for others, respect for difference and diversity, exploration and dialogue.

The Law Times- 1846

Special Needs Education-South Africa. Department of Education 2001

Resources in Education- 1978 Serves as an index to Eric reports [microform].

ABC of Communication Studies-David Gill 1998 This text provides a modern guide to the concepts and terms used in communication and media studies.

Irish University Press Series of British Parliamentary Papers-Great Britain. Parliament 1968

Doctoral Education in South Africa-Cloete, Nico 2015-12-08 Worldwide, in Africa and in South Africa, the importance of the doctorate has increased disproportionately in relation to its share of the overall graduate output over the past decade. This heightened attention has not only been concerned with the traditional role of the PhD, namely the provision of future academics; rather, it has focused on the increasingly important role that higher education - and, particularly, high-level skills - is perceived to play in national development and the knowledge economy. This book is unique in the area of research into doctoral studies because it draws on a large number of studies conducted by the Centre of Higher Education Trust (CHET) and the Centre for Research on Evaluation, Science and Technology (CREST), as well as on studies from the rest of Africa and the world. In addition to the historical studies, new quantitative and qualitative research was undertaken to produce the evidence base for the analyses presented in the book. The findings presented in Doctoral Education in South Africa pose anew at least six tough policy questions that the country has struggled with since 1994, and continues to struggle with, if it wishes to gear up the system to meet the target of 5 000 new doctorates a year by 2030. Discourses framed around the single imperatives of growth, efficiency, transformation or quality will not, however, generate the kind of policy discourses required to resolve these tough policy questions effectively. What is needed is a change in approach that accommodates multiple imperatives and allows for these to be addressed simultaneously.

The Resident Course-Serpell G. Patrick 1960

Handbook of Vocational Education and Training-Simon McGrath 2019-07-29 This handbook brings together and promotes research on the area of vocational education and training (VET). It analyzes current and future economic and labor market trends and relates these to likely implications for vocational education and training. It questions how VET engages with the growing power of human development approaches and with the sustainable development agenda. Equity and inclusion are discussed in a range of ways by the authors and the consideration of the construction of these terms is an important element of the handbook. It further addresses both the overall notion of system reform, at different scales, and what is known about particular technologies of systems reform across a variety of settings. Vocational learning and VET teacher/trainer education are discussed from a comparative perspective. National and comparative experiences are also shared on questions of equity and efficiency in funding in terms of those that fund and are funded, and for a range of funding methodologies. As well as reviewing existing gaps, this handbook is looking forward in identifying promising new directions in research and environment. Areas covered: The Changing World of Work | Editors: Margarita Pavlova and Salim Akojee Skills for Sustainable Human Development | Editor: Lesley Powell Planning and Reforming Skills Systems | Editor: Robert Palmer Private Training Markets | Editors: Michael Gessler, Larissa Freund and Susanne Peters Vocational Learning | Editors: Karen Evans and Natasha Kersh Competence and Excellence | Editor: Kirby Barrick Measuring Learning and Instructional Performance | Editor: Esther Winther Supporting Learners | Editor: Joy Papier VET Teacher/Trainer Education | Editor: Volker Wedekind

Higher Education Admissions Practices-María Elena Oliveri 2020-01-30 This book provides a path for resolving challenges related to access, diversity, equity, and other issues facing higher education admissions. It illuminates current higher education admissions practices in a global context, highlighting common obstacles. The chapters outline decision-making models used in college admissions, details those assessments commonly employed in admissions, and provides innovative perspectives on the future of admissions. The book's multidisciplinary approach defines

much-needed changes in admissions brought about by shifts in the makeup of student populations and in higher education itself. Rationales for moving away from traditional assessments used in admissions and expanding the criteria used to ensure a student's academic success are discussed. Readers will come away with an understanding of the current issues, philosophies, and historical circumstances facing higher education admissions across the globe and will be equipped to contemplate and react to future possibilities and opportunities.

Transformation in Higher Education-Nico Cloete 2006 This book presents the most comprehensive and most thorough study of the developments in South African higher education and research after the first democratic elections of 1994 - that is of post-Apartheid South African higher education. This volume will provide its readers with a detailed insight into the new (i.e. post-1994) South African higher education system. The large number of experienced authors and editors involved in the book guarantees that the reader will be introduced in the new SA higher education system from a large number of perspectives that are presented in a consistent and coherent way. This book will be of interest to scholars, students, administrators, policymakers and politicians interested in South Africa, higher education and research, and policy analysis. "Publications on higher education are not new. But this volume, which is the first of its kind as a collective effort of tracing and examining the twists and turns taken by processes of change in the South African higher education system in a context of profound societal and global transformation, adds a fresh dimension to the debate. In its examination of the extent to which the changes were in line with policy intentions, particularly with regard to equity, democratisation, responsiveness and efficiency, and how a new institutional landscape started emerging, it makes a momentous contribution to the current debate about higher education restructuring." Njabulo Ndebele, Vice-chancellor, University of Cape Town and Chair of the South African Association of University Vice-chancellors "This book addresses a rich variety of issues on South African higher education. It puts these in the relevant context of the process of globalization and it shows that the South African experiences offer us a lot to learn. Highly recommended for those who are intrigued by the innovations taking place in South African higher education as well as for those who intend to grasp the effects of globalization." Frans van Vught, Rector Magnificus and founding Director of the Center for Higher Education Policy Studies, University of Twente, The Netherlands "Reflection is a crucial ingredient to learning. In this book on higher education we have reflections on a unique period in the history of a country that managed its transition to democracy in a way that was unique, but from which we can all learn. Higher education in South Africa played a vital role in that transition and was part of the many tensions, choices and influences. They have been thoughtfully captured." Brenda Gourley, Vice-chancellor, The Open University, UK and board member, Centre for Higher Education Transformation. "No contemporary higher education system has changed as dramatically as that in South Africa. This book, rich in data, examines the changes that took place and offers insights into how change frequently cannot be predicted. The analysis captures the excitement, high expectations, remarkable successes, and failures in the transformation of the apartheid system of higher education. This excellent study provides rich fare for comparative analysis." Fred M. Hayward, American Council on Education Pilot Project, Executive Vice President, Council for Higher Education Accreditation, US.

Life Orientation-Juta Academic 2011-12-01 This book was developed in order to deliver a unit standards-based curriculum that is in line with the National Qualifications-Framework (NQF).

Theorizing STEM Education in the 21st Century-Kehdinga George Fomunyam 2020-02-26 Theorising STEM Education in the 21st Century is a book that captures the essence of Science, Technology, Engineering and Mathematics and the intricacies of STEM education in the contemporary society. It explores STEM as an interdisciplinary field as well as the individual disciplines that make up STEM. This ensures the field of STEM as a whole is theorised. The book provides critical insight on STEM education from Cairo to Cape Town or from America to Indonesia. With a team of authors from universities across the world, the book is a vital contribution to critical scholarship on STEM education in contemporary times.

Building Capacity in Institutional Research and Decision Support in Higher Education-Karen L. Webber 2018-01-31 This book examines the relevant roles, skills and knowledge needed to build the institutional research capacity across the higher education sector globally. The information contained herein will inform IR practitioners, senior level institution officials, and higher education scholars. With a focus on building the capacity of the IR profession, this book's primary audiences include senior leaders who wish to introduce or strengthen their understanding for effective decision support and staff members who are currently in decision support units and those who wish to serve in this capacity. However, this book also offers detail on the decision support function to higher education scholars who seek to better address how data can inform policy and planning in higher education. Through a broad discussion about the roles and skills of the practitioners, this book will also enumerate the ways in which decision support practitioners can be valued contributors in shaping the future decisions and direction of specific institutions and higher education broadly.

Drawing Office Manual-State Mutual Book & Periodical Service, Limited 1982-01-01

The Science of Science-Dashun Wang 2021-02-28 This is the first comprehensive overview of the exciting field of the 'science of science'. With anecdotes and detailed, easy-to-follow explanations of the research, this book is accessible to all scientists, policy makers, and administrators with an interest in the wider scientific enterprise.

Accountability in Higher Education-Bjorn Stensaker 2010-09-13 The latest volume in the Routledge International Studies in Higher Education series, Accountability in Higher Education takes an in-depth look at accountability initiatives around the world. Various evaluations, reporting schemes, and indicator systems have been initiated both to inform the public about higher education performance and to help transform universities and colleges and improve their functioning. This edited collection provides a comparative analysis of the promises, perils and paradoxes of accountability, and the potential effect on power structures and higher education autonomy, trust and the legitimacy of the sector. Part I describes how accountability is perceived and understood in different regions of the world, identifies some of the most common elements in established accountability initiatives, especially related to quality assurance, and provides direction for possible future development. Part II focuses on responses to new demands for accountability at institutional, national and international levels, and provides practical guidance for handling accountability going forward, emphasizing the dynamic relationship between international development, government strategies and organizational change. This volume is a must-have resource for HE managers, administrators, policy makers, researchers, HE graduate students and those interested or involved with HE accountability practices.

Policy and Practice in Bilingual Education-Ofelia García 1995-01-01 A collection of pivotal papers from 1986-1993 on bilingualism and bilingual education, grouped in sections on policy and legislation, implementation of bilingual policy in schools, bilingualism in instruction, and using the bilingualism of the school community. Articles conclude with suggested student activities and discussion questions, encouraging students to take on an advocacy-oriented role. The reader can be used alone or with the publisher's Foundations of Bilingual Education and Bilingualism. No index. Annotation copyright by Book News, Inc., Portland, OR
