The Complete Trailer Sailor: How to Buy, Equip, and Handle Small Cruising Sailboats-Brian Gilbert

2007-06-22 A soup-to-nuts introduction to small, economical sailing craft Trailer sailers--the smallest, most economical sailboats with sleeping accommodations--are a popular platform for learning the basics of sailing and are often considered to be the entry level to cruising under sail. Author Brian Gilbert shows how trailer sailers can be the ideal craft for a lifetime of enjoyment, including serious, long-distance cruising. This book covers all the bases, including how to inspect, buy, and equip a boat; how to trailer, sail, navigate, and cruise in small boats; how to use communications and navigation equipment; and more.

Motorized Obsessions-Paul R. Josephson 2007-08-22 From dirt bikes and jet skis to weed wackers and snowblowers, machines powered by small gas engines have become a permanent—and loud—fixture in American culture. But fifty years of high-speed fun and pristine lawns have not come without cost. In the first comprehensive history of the small-bore engine and the technology it powers, Paul R. Josephson explores the political, environmental, and public health issues surrounding one of America's most dangerous pastimes. Each chapter tells the story of an ecosystem within the United States and the devices that wreak havoc on it—personal watercraft (PWCs) on inland lakes and rivers; all-terrain vehicles (ATVs) in deserts and forests; lawn mowers and leaf blowers in suburbia. In addition to environmental impacts, Josephson discusses the development and promotion of these technologies, the legal and regulatory efforts made to improve their safety and environmental soundness, and the role of owners' clubs in encouraging responsible operation. Synthesizing

information from medical journals, recent environmental research, nongovernmental organizations, and manufacturers, Josephson's compelling history leads to one irrefutable conclusion: these machines cannot be operated without loss of life and loss of habitat.

The 12-Volt Bible for Boats-Miner K. Brotherton

2002-11-11 The 12-Volt Bible for Boats is a clear, nonthreatening introduction to the 12-volt electrical systems used on small boats to power everything from reading lights to bilge pumps. Wind Vision-U. S. Department U.S. Department of Energy

2015-03-18 This book provides a detailed roadmap of technical, economic, and institutional actions by the wind industry, the wind research community, and others to optimize wind's potential contribution to a cleaner, more reliable, low-carbon, domestic energy generation portfolio, utilizing U.S. manufacturing and a U.S. workforce. The roadmap is intended to be the beginning of an evolving,

collaborative, and necessarily dynamic process. It thus suggests an approach of continual updates at least every two years, informed by its analysis activities. Roadmap actions are identified in nine topical areas, introduced below.

Where the River Meets the Sky-Jim Quartieri 2009-12

WHERE THE RIVER MEETS THE SKY Jim Quartieri Travel through India in times long past and accompany two seekers on their spiritual journey. So many seek and so few find the answers to our ancientness. As you read this book you will become encapsulated in the beauty of nature, seen through the eyes of two who have been mesmerized by its wisdom. This writing is a creation from many years spent in the forest; learn its secrets and subtle simplicity. Take the journey that very few are only now beginning to look for. India's varied landscapes are mentioned in depth, with appropriately placed poems throughout. Two ascetics travel throughout India teaching the art of meditation, living a spiritual life in the mundane world, and commitment to the goal of enlightenment. The processes that the travelers experience allow them to unfold their consciousness to real awareness.

HANDLING STORMS AT SEA-Hal Roth 2008-07-01 The definitive guide to a critical, hotly debated topic How should a sailor cope with storms at sea? Some advocate heaving-to, others running off. Some say trail a sea anchor over the bow, others a drogue astern. The stakes in the discussion couldn't be higher, or the consensus lower. Finally, preeminent sailor/author Hal Roth offers a practical strategy that can evolve and respond as storms grow stronger.

Credit Constraints as a Barrier to Technology

Adoption by the Poor-Xavier Gine 2005 "It is generally recognized that the adoption of a new technology plays a fundamental role in the development process. However, the benefits from the introduction of the technology may be unevenly distributed among the population, especially if the markets do not function properly. While the microeconomic literature on technology adopted and diffusion focuses on "who" and "when," the macroeconomic literature has focused on the overall impact of globalization on inequality. In this paper the authors bring these two strands of the literature together by studying the diffusion of plastic reinforced fiber boats in a fishing village in Tamil Nadu and by analyzing the dynamics of income inequality during this process. Plastiki-David de Rothschild 2011-04-29 Explorer, global green leader, and eco-TV host David de Rothschild recounts the extraordinary journey of the Plastiki, an innovative and mostly untested sixty-foot catamaran that floats on 12,500 reclaimed plastic bottles. It was a voyage that took de Rothschild and a five-person crew 10,000 miles from the U.S. to Australia, sailing through rarely traveled, dangerous waters, risking their lives to call attention to our fragile oceans. Their exploration included urgent study of ocean pollution, island nations threatened by rising seas, damaged coral reefs, and the acidifying ocean itself and their discoveries are a call to action. Packed with exciting narrative, images, maps, journal entries, plans, and sketches, this is the only firsthand account of what may be the most important adventure of our time.

The Vega Adventures-Shane Granger 2015-07-01 Early in 1892, one of Norway's finest boat builders launched a sailing legend. Over 100 years later Shane Granger and Meggi Macoun were peacefully enjoying a siesta when the great tsunami of 2004 changed their lives forever. With thousands of people desperately in need, they loaded their boat with donated food and medical supplies then set sail for Sumatra. That voyage was the beginning of a rip-roaring real life sea tale complete with storms, adventures, exotic tropical islands, and heart-rending drama. Come feel the wind, smell the riggers tar, and taste the salt in this tale of a century old wooden sailing boat and her crew of intrepid adventurers as they take up their yearly 7,500-mile journey to deliver over 25 tons of educational and medical supplies to some of our world's most remote island communities. About the Author SHANE GRANGER (1948 - until his luck runs out) has been in love with the sea since he was seven years old. Having worked as a radio DJ, advertising photographer, boat builder, director of museum ship

restoration, and bush pilot, he has always come back to the sea. Shane has sailed thousands of miles solo, most of that on a square-rigged brigantine he salvaged from a beach in West Africa - a vessel he once single-handedly sailed across the Atlantic without a functioning rudder. After walking across the Sahara Desert, and being kidnapped by bandits in Afghanistan, his greatest ambition in life is to find a comfortable niche where he can enjoy the healthy benefits of monotony and boredom. He currently lives on an ancient wooden sailing boat with his partner Meggi Macoun and their cat Scourge.

An American Angler in Australia-Zane Grey 2021-10-01 In 1936, the celebrated American author Zane Grey arrived in the sleepy New South Wales town of Bermagui, with the express reason of angling for the world's largest fish - Marlin, sharks and Swordfish. Here is his little classic of the chase. Four miles out I sighted a long sickle fin cutting through a swell. Did I yell, "Marlin!?" I certainly did. An instant later Peter sighted another farther out, and this tail fin belonged to a large fish. I could not tell whether or not it indicated a black marlin. It stood up three feet or more, and that much would make a tail spread of over six feet. These marlin were riding the swells and they were moving fast. The tails would come up out of the top of a swell and cut the

water at more than a ten-knot speed. Then they would vanish. It is always necessary to run the boat in the right direction to head the fish off. The Avalon is fast - she can do eighteen knots when opened up - but we could not catch up with the big fellow.
